SEVEN BIG IDEAS THAT CAME TO LIFE BY THINKING BEYOND STORAGE

Big ideas won't take flight if your data storage can't keep up.
True innovation can only happen when your storage technology is so nimble, stable, and future-ready that it fades into the background. Whether you're designing state-of-the-art jetliners, creating mind-blowing visual effects, discovering the next cure for diseases, or predicting weather patterns, Panasas allows you to execute the big ideas that can change your business, your customers, and your world.

Here are seven world-changing metrics that were made possible with Panasas® ActiveStor®:

130 million video games
shipped worldwide, thanks to fast, scalable rendering of lifelike characters and amazing special effects

3.5 Gs of lateral gravitational force
achieved by Formula One race cars while cornering during designer vehicle simulations

15,000 genomes
sequenced annually, allowing a leading medical research institute to provide genetic answers to life's biggest health questions

30 times its weight in liquid
absorbed by the gel material in disposable diapers created by a multinational consumer goods firm

30.0

4 million miles
traveled each year by polar orbiting satellites that accurately forecast weather

42.6 billion packages of stackable potato chips
sold in 2017 in the United States, manufactured by a leading consumer goods company

3 billion airline passengers
transported around the globe in 2017 by the world's largest aerospace manufacturer

Panasas offers the world's only plug-and-play parallel storage system—with performance that improves with scale, data reliability that increases with scale, and manageability that retains with scale.
